

MODULE 6

- How Government can intervene in the market ?

- Tax and subsidies
- Setting max/min prices
- Setting max/min quantities

Tax

- The Government can impose taxes on consumers or in the firms
- Let's look at the supply
- Remembering the lecture about supply we know that the optimal condition is

$$P = CM_g$$

- With taxes, every quantity the firm sell needs to pay a tax τ

- Then we have

$$P = CMG + \epsilon$$

- Graphically we have

For every quantity Q , I need to sell for $P + \epsilon$

- In the EQUILIBRIUM

$C = \Delta$
DWL

$A =$ [red box]
 $B =$ [blue box]

Cons. pay A
to gov

Firms pay B
to gov

• Relationship with Elasticity

- Suppose the gov decides to tax the ice cream consumers
- There is a decrease on the marginal benefit of buying ice cream

- Suppose Demand Inelastic

☑ Firms Pay

☑ Cons Pay

- Suppose S is inelastic

⊗ Firms pay

⊗ Cons. pay

- Conclusion .

INELASTIC SIDE PAYS MORE

• Subsidy over Firms

- Lower Cost to produce

Gov has
a cost of
Implementing

- Price Ceiling

$Q^D > Q^S$
Shortage

- Rent

- Price Floor

$$Q^S > Q^D$$

Surplus

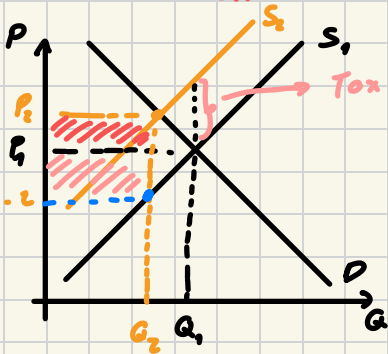

- Minimum wage

• QUOTAS

Solutions

Q_1

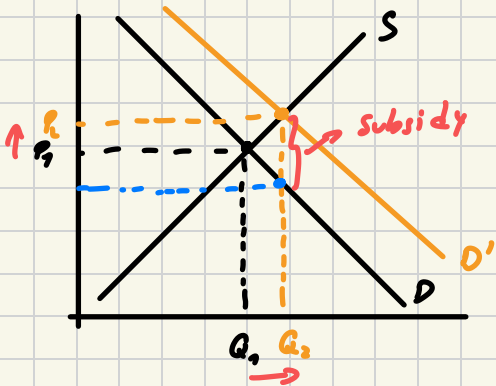

/// Cons pay

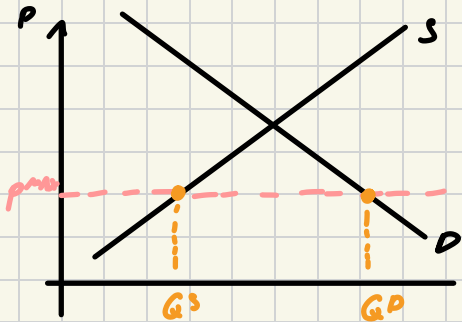

/// Firms pay

More Inelastic
side pays more

Solutions Q_2

Question 3

$Q^D > Q^S$
shortage

Question 4

a) Demand: $P = 500 - 10Q$

Supply: $P = 100 + \frac{10}{3}Q$

$$500 - 10Q = 100 + \frac{10}{3}Q$$

$$400 = \frac{40}{3}Q$$

$$100 \cdot \frac{3}{40} = Q$$

$$Q = 30, \quad P = 500 - 10 \cdot 30$$

$$= 500 - 300$$

$$= 200$$

b) For all quantities sold, the price will be
 $P' = P + 50 \Rightarrow P = P' - 50$

$$P' - 50 = 100 + \frac{10}{3} Q$$

$$P' = 150 + \frac{10}{3} Q$$

$$c) 150 + \frac{10}{3}Q = 500 - 10Q$$

$$350 = \frac{40}{3}Q$$

$$Q = \frac{105}{4}$$

$$P' = 500 - 10 \cdot \frac{105}{4}$$

$$P' = \frac{1000 - 525}{2} = \frac{475}{2}$$

$$P = \frac{475}{2} - 50 = \frac{375}{2}$$

Question 5

Amount that firms pay

You need Perfect Inelastic Demand or Supply

In this case, Q does not change, hence $Q \cdot Z$ is maximum.
The gov can impose any tax and the quantity won't decrease
